Technical Projects

50 STATE VOYAGE

Travel application to track and plan out future visits to any US state while sharing ideas with friends
- Built the user interface using React with Reactstrap for styling & Redux to manage application state
- Integrated Google API (Maps Javascript & Places APIs) to display business data and locations on a map
- Produced a Rails API backend with a PostgreSQL database and serializers to handle relationships between models
- Utilized JSON Web Tokens for authentication and localStorage to store encrypted user information client-side

FIT-TASK-IC

Goal setting and habit tracking application with graphical representations of accomplishments
- Constructed a user interface using React with Bootstrap 4 styling
- Incorporated multiple graphs with Chart.js to provide visuals of progress towards goals
- Developed a Rails API backend with serializers to display the user's personal progress and goals
- Utilized JSON Web Tokens for authentication and localStorage to store encrypted user information client-side

TRIVIA PARTY

Trivia application to test knowledge and become a high scorer on various quizzes
- Utilized Vanilla Javascript and CSS to implement a single page application
- Scraped an Open Trivia API to provide default quizzes for new users
- Developed a Rails API backend with a PostgreSQL database to manage models and relationships

Work Experience

CAREMETX, LLC

Program Supervisor | 11/2016 - 06/2020 | Oakland, CA
- Collaborated with client's internal programs to help with transitioning new patients onto commercial therapy for client's new product launch
- Conducted performance reviews, provided feedback, and promoted career growth opportunities to 8 direct reports
- Assisted with hiring new employees and created training plans to ramp up employees
- Addressed client escalations by troubleshooting through issues and providing responses

AMERISOURCEBERGEN CONSULTING SERVICES - LASH GROUP

Team Coordinator (Supervisor) | 11/2011 - 10/2016 | San Bruno, CA
- Created standard script team utilized when relaying reimbursement support to providers and patients
- Developed, tested, & launched a new results form and supplemental documents that was sent to providers
- Completed complex weekly analysis of program data for client and senior/executive leadership review
- Increased productivity & quality by 20% in a year through motivation feedback sessions & interactive trainings
